

The Leelanau County Brownfield Redevelopment Authority (LCBRA) is interested in identifying contaminated or potentially contaminated sites (Brownfields) in Leelanau County. These sites will be assessed in order to position them for redevelopment, and reuse. Nominated sites may be included in a County-wide inventory that is being developed. These sites may be owned by a Local Unit of Government (LUG) or privately held.

Please use the form below to provide information on any sites you know of that may have some contamination issues. You can nominate sites anonymously – no need to provide your name or contact information. This program is a voluntary program, and the LCBRA will NOT pursue any actions on properties that may be found to be contaminated. As the County develops the list of potential sites, the LCBRA will only include sites that are part of the public record with respect to environmental issues, and/or the property owner approves of the site being included on the list.

Your assistance with this request is greatly appreciated.

Site Name:

Community Priority
_____ **High** _____ **Medium** _____ **Low**

Site Address or Location:

Tax Parcel Number:

Current Owner:

Former Owner(s) of Significance (e.g. the former manufacturer):

Is there KNOWN environmental contamination at the site? If yes, please explain.

Is there existing or potential developer interest in this site and/or adjacent sites? If yes, please explain.

Please include any other information such as site survey, tax assessment information, or other records that help identify the site.

Please send this form to:
